

Tensta språkkafé på utflykt till Konstfack 2019-05-05

Sammanställning av Stig Rosenlund

Förutom de bilder jag tagit själv har jag medtagit några av Fahymas bilder, där jag själv är med.

Vi samlades c:a 13:00 i konsthallen och tog tunnelbana till Telefonplan, som ligger några meter från Konstfack. Där mötte oss Nina.

Utanför konsthallen.

Where the exoskeletal foliage waved dark
and silver in the wind, and beyond the whi-
te-hot ground of the forest, a brook of melted
permafluid ran invisible and loud under the
decaying framework of the hydrocarbon
fields, with a great murmur, passionate and
gentle

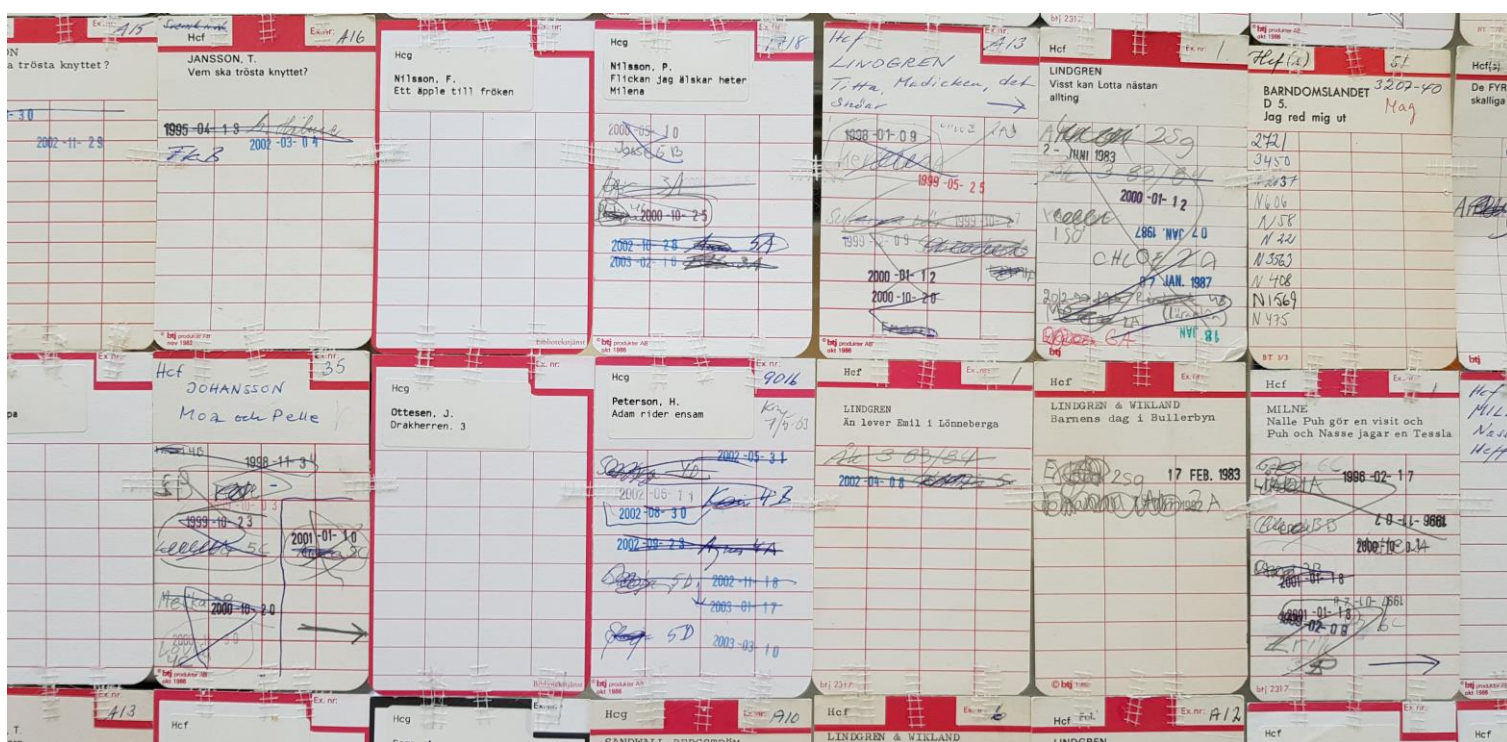

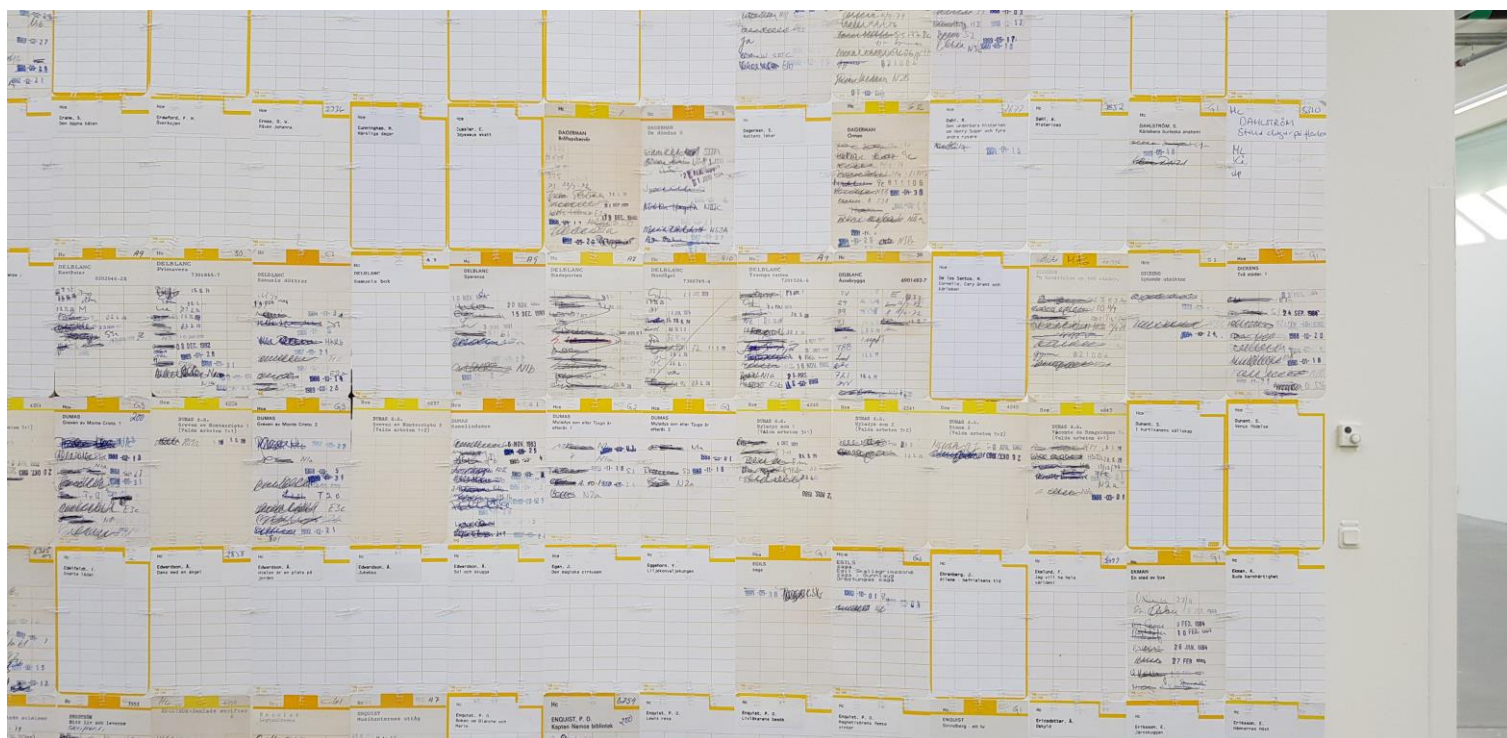

Where they ejaculated sulfate aerosol into
the sky, and the earth, like a grateful subser-
vient, let out a moan with the injection, and
you said goodbye as the smog embraced that
last sunset like a veil

Where you ascended from the warm soil,
piercing through whatever remained like
claws through fermented cartilage

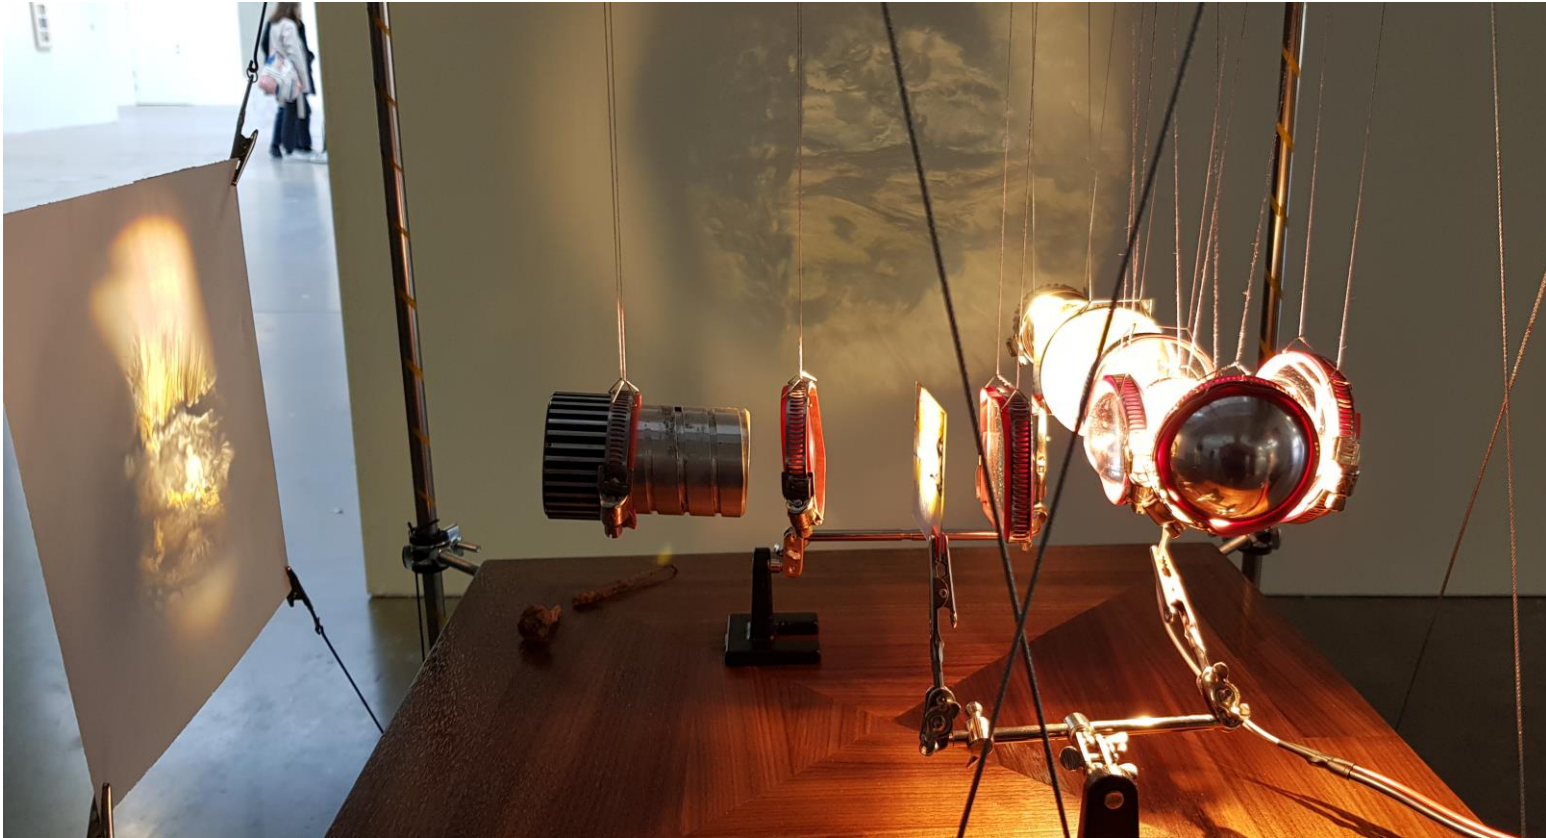

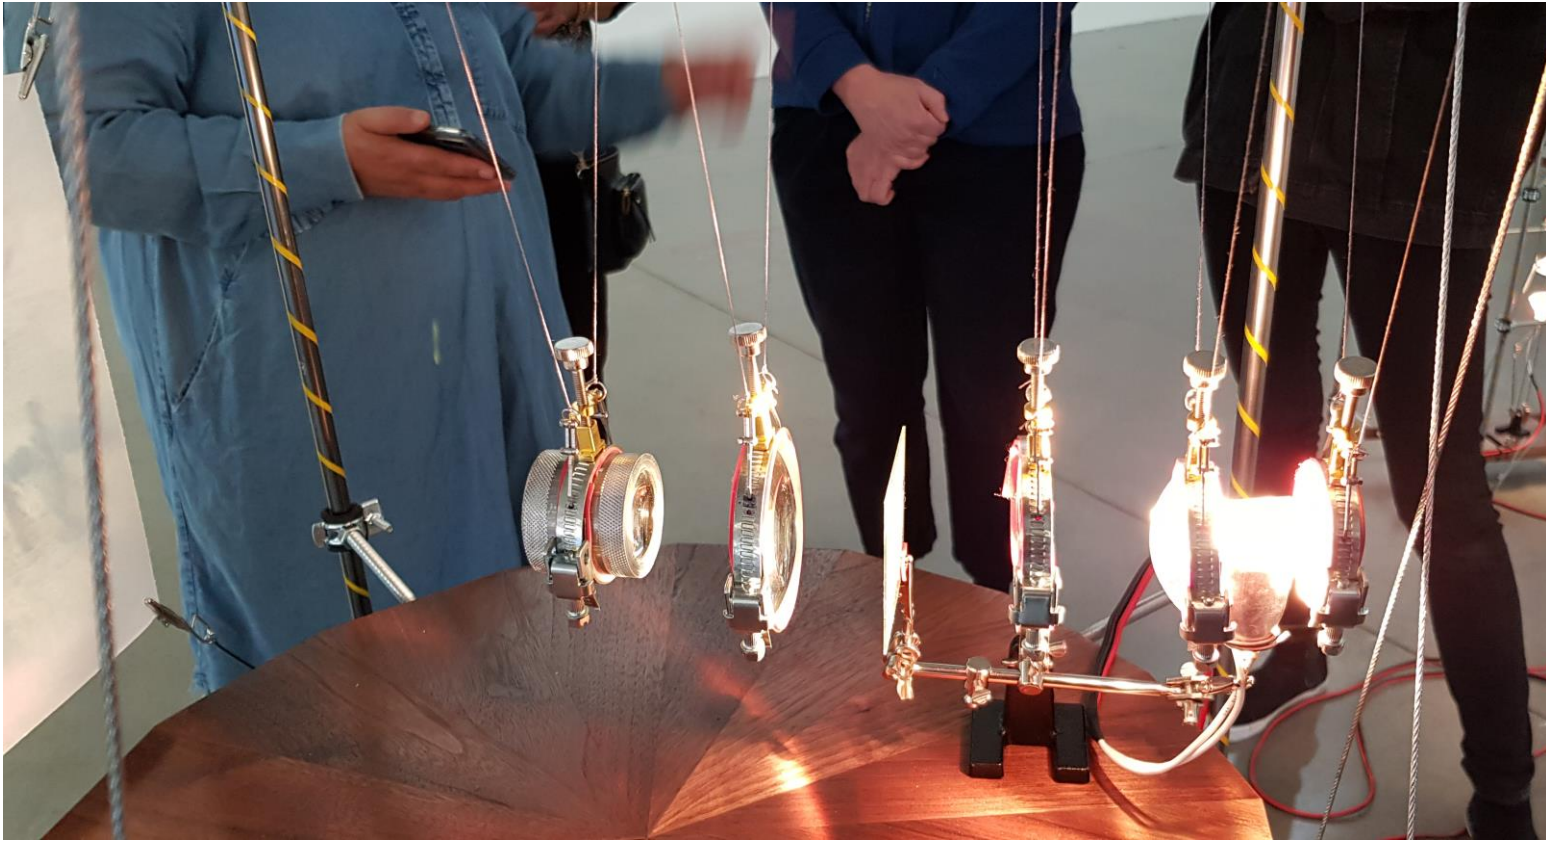

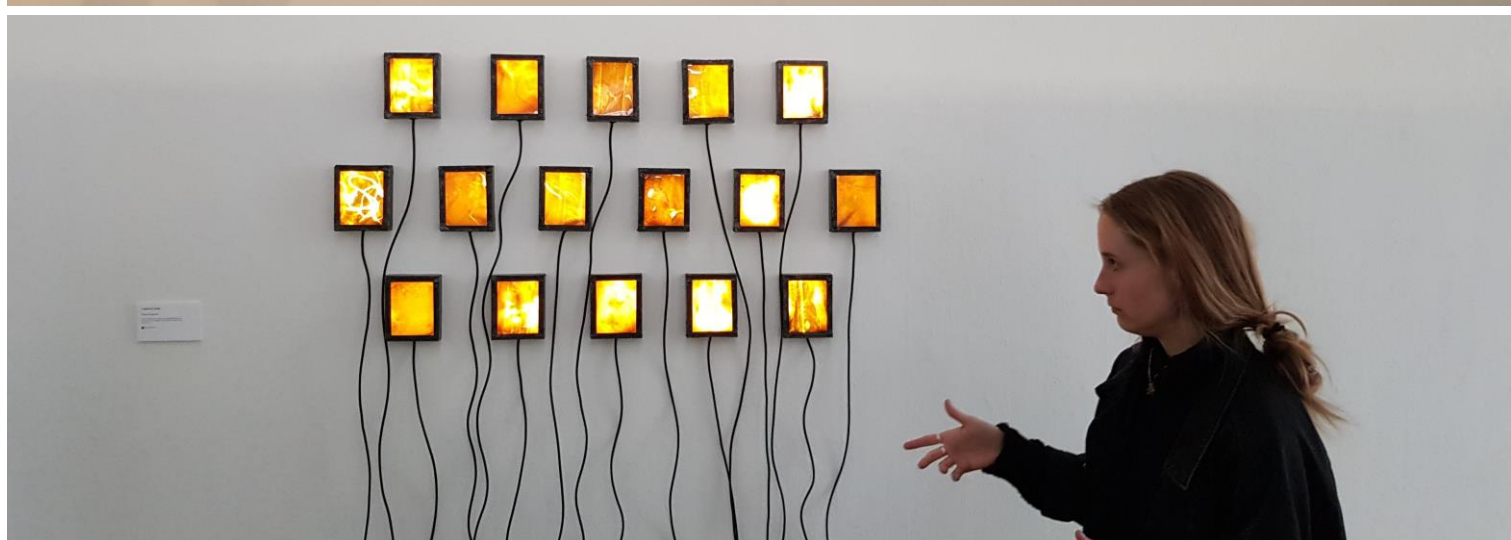

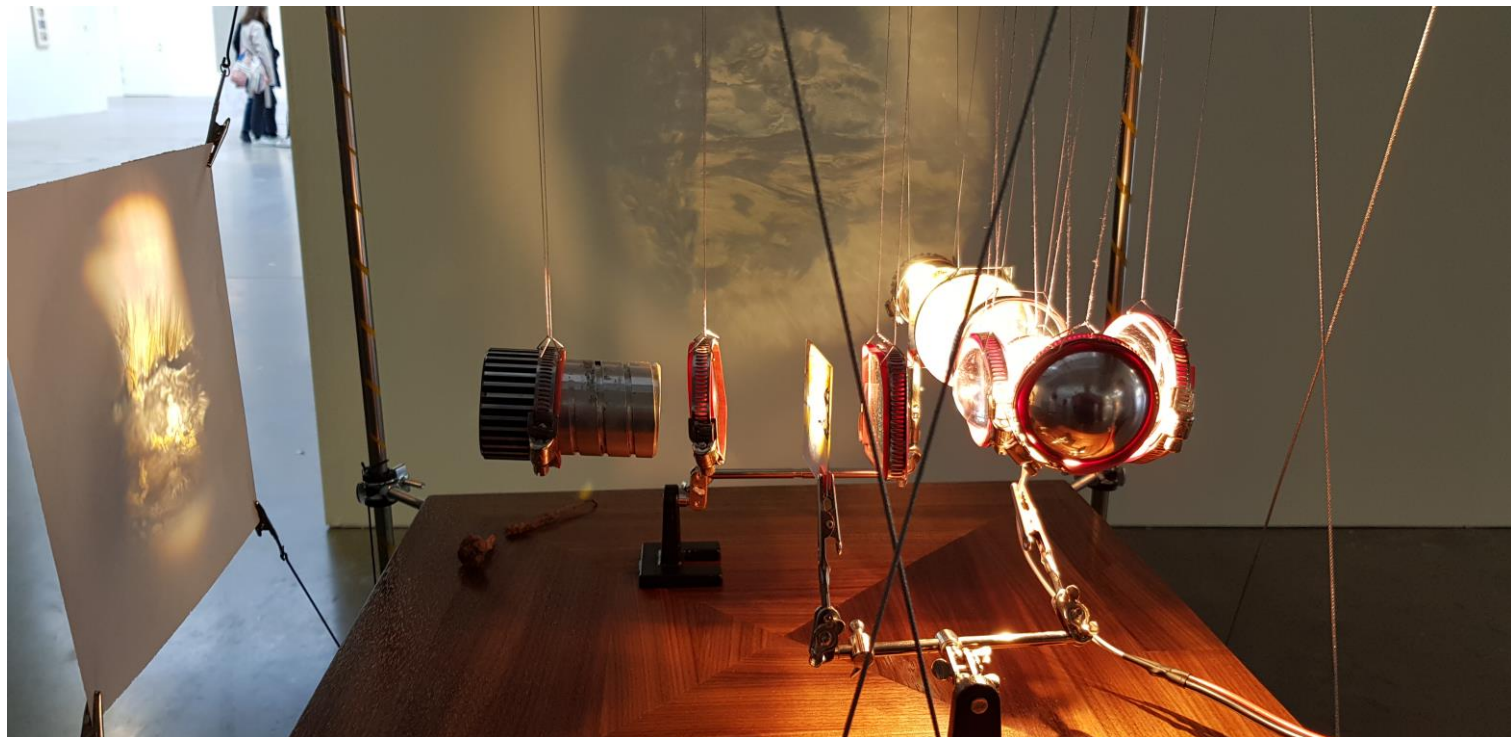

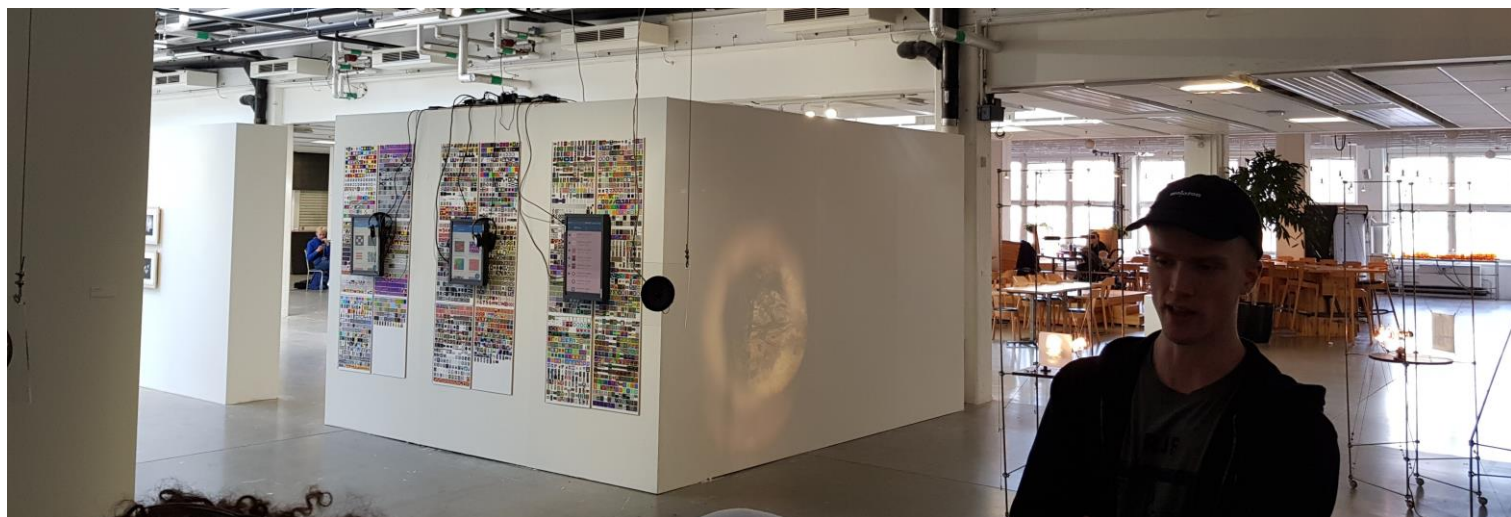

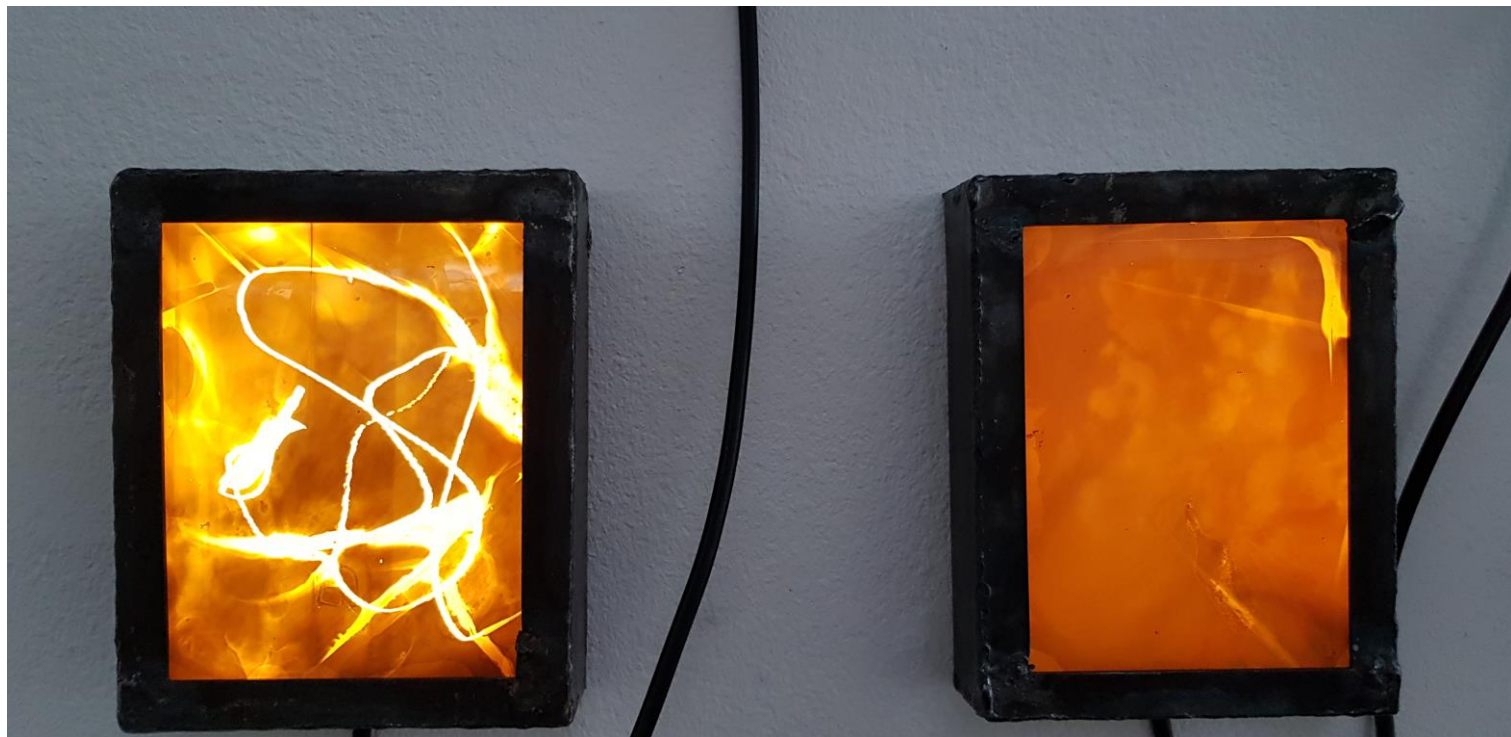

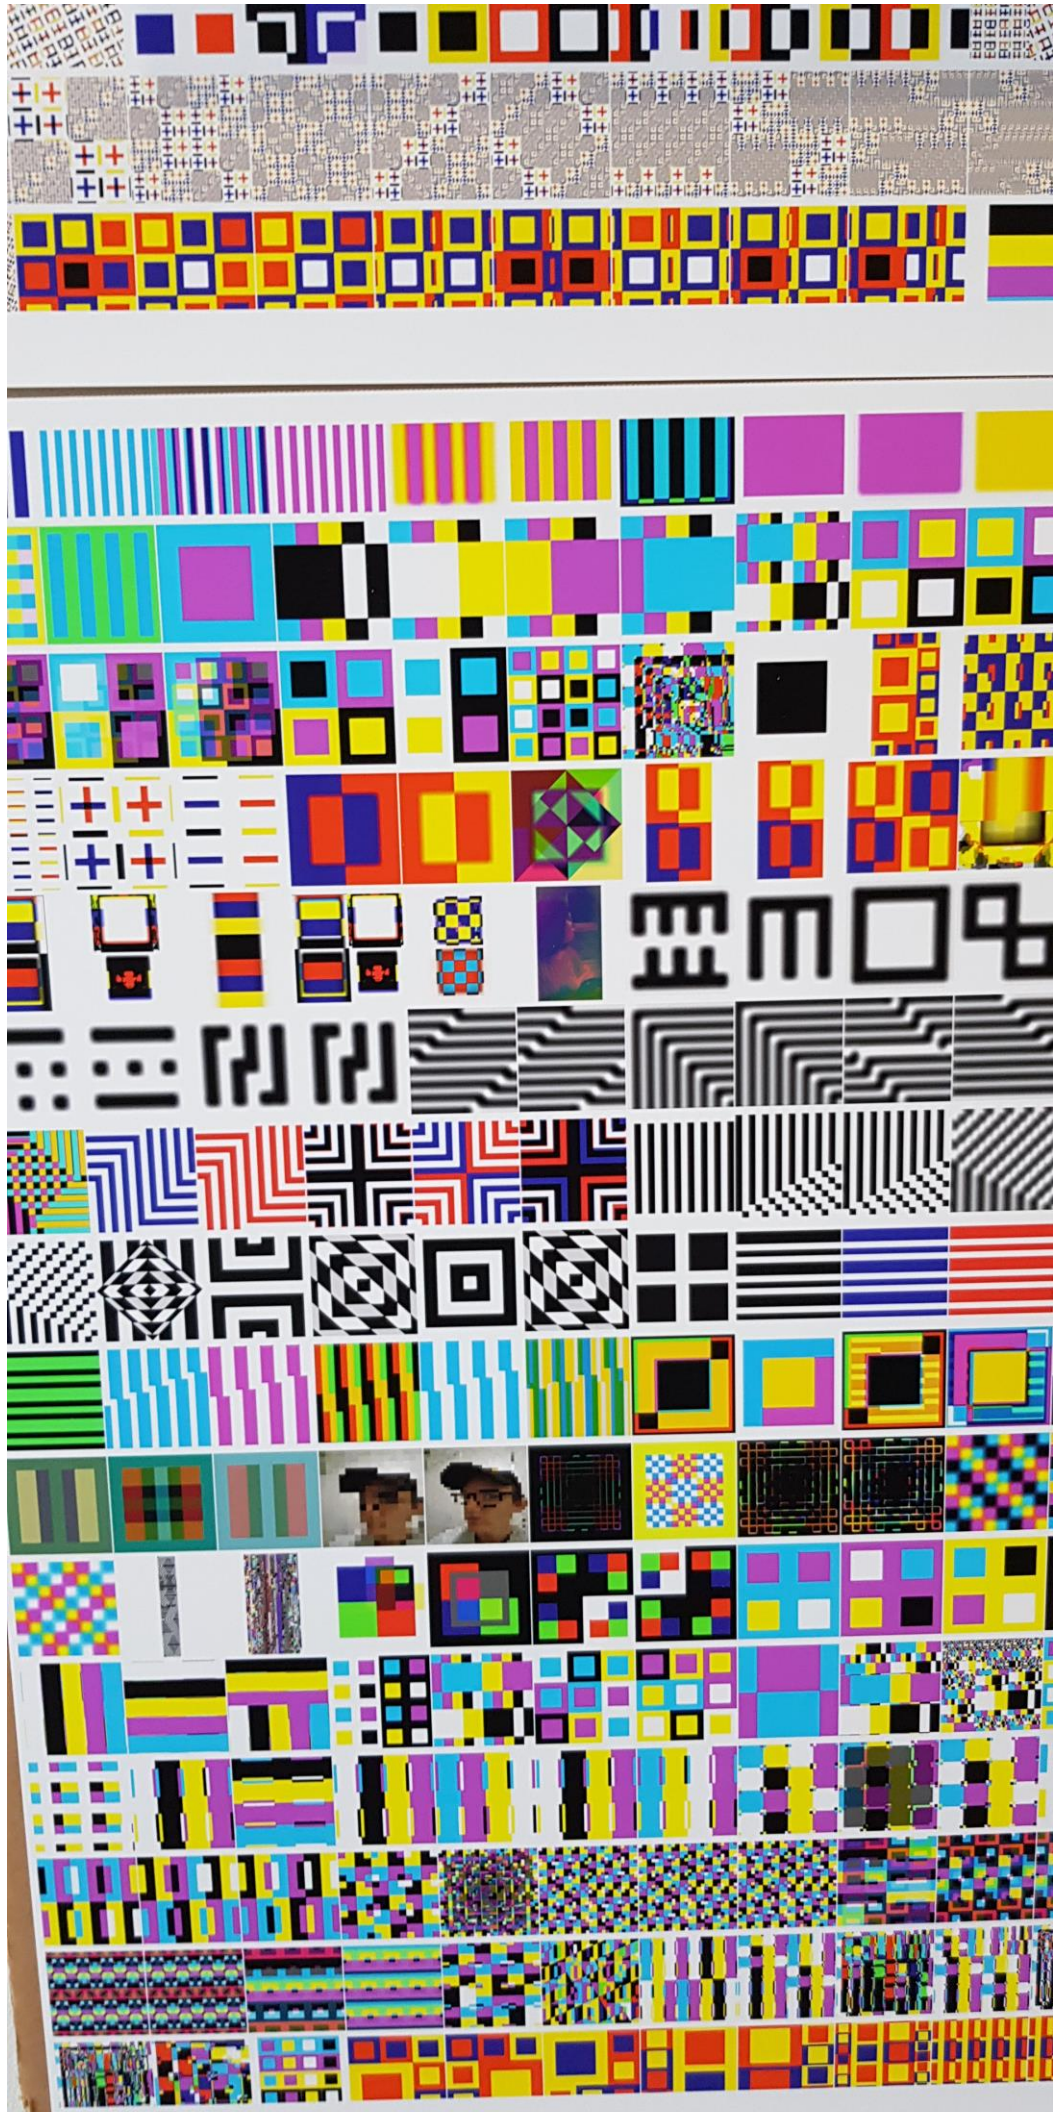

En 3-D-printer. Den verkade inte göra något just nu.
